# About Us

DECO GLOBAL is a multinational company which offers a full range of equipment and product supply, engineering, consulting and project management services, focusing in comprehensive solutions for Medical, Defense, Marine and Energy sectors. Headquartered in Istanbul since 2008, we have partnered with only the highest quality & most reputable equipment manufacturers in the World, solidifying our reputation as the leading supplier of medical, marine, defense and marine equipment. With a strong track record and background, DECO GLOBAL focuses Africa, America and Europe, seeking out opportunities to extend the value of our clients in established and strong projects with solid yields and fundamentals.

By leveraging an extensive network of alliances with global industry leaders, DECO GLOBAL is able to provide you with the most innovative and efficient solutions to meet your business needs. This powerful network of carefully selected partners allows DECO GLOBAL clients to benefit from the combined know how of market leaders all from a single source, service, supply and management point of view.

We have succeeded in creating an internationally competitive, development-oriented, and stable business group, whose growth couldn't be stopped neither by extreme pressure of competition nor the last years' recession. Our future will continue to be built upon high-quality offer of complete range of products and services, on strengthening the flexibility and competitiveness, on mastering new products, and the profit will still be invested back into the business for increased knowledge, market development and technological advancement.

# Vision & Mission

---

## Our Mission

To provide high quality and reliable service and products with superior value to customers and end users, improving well-being and enhancing the quality of peoples' lives. While providing our products, we also guarantee absolute customer satisfaction, affordable prices and personal attention to each order and service to gain the trust of our customers.

## Our Vision

To create mutual profits for both parties by providing customers with high quality products, equipment and services on reasonable prices, on time delivery.

## Our Values

- Always improve.
- Never compromise on quality.
- Make a positive difference.
- Provide full transparency.
- Treat people fairly and equitably.
- Work collaboratively.
- Seek creative solutions.
- Be agile and strategic.

## Co-Founder Message

# Co-Founder Message

As DECO GLOBAL, our aim is to make sure that the services and products we provide until today are utilized properly for the good people of our partnering countries. And then to develop a win-win strategy by ensuring that the competitive, professional and reliable services and products to all players of the medical, defense, marine and power industries.

As DECO GLOBAL, we are investing throughout our sectors in fields that will feed synergies between our group companies. Thanks to this synergy we created among our group companies, we continue to take important steps to transform DECO GLOBAL into a well-known global brand that provides value-added services for its customers and partners.

We want this to be known that we stand behind all the services and products we provide to our customers and business partners with all our strength. Together with our professional team, we will continue to offer and implement the fastest, reliable, competitive and transparent solutions for the industries we are in.

Co-Founder

A worker in a high-visibility yellow and blue jacket and white hard hat is walking away from the camera in an industrial facility. The scene is dimly lit with blue-toned overhead lights. Large, cylindrical metal tanks are visible on the left side of the frame. In the background, there are various pieces of industrial equipment, including what appears to be a welding station or gas cylinder. The overall atmosphere is industrial and professional.

Indust

A worker in a yellow safety vest and white hard hat stands in a large industrial facility, looking at a large circular metal component on a machine. The scene is dimly lit with blue and white lights, creating a professional and industrial atmosphere. The worker is seen from the side, holding a clipboard. The large circular component is the central focus, mounted on a complex metal structure.

# DECO | MEDICAL

**For further information please visit: [www.watmindturkey.com](http://www.watmindturkey.com)**

DECO Medical is a leading global supplier of medical & healthcare products and hospital equipment. Our aim is to strengthen healthcare through engagement, cooperation and affordable products & solutions in close partnership with local stakeholders.

We provide tailored intelligent medical & healthcare solutions based on the latest professional insights, and on decades of experience in continents. Every year, we supply high volumes of medical and healthcare products to our customers. DECO Medical is committed to create a difference in North and South America, Europe and Africa.

With more than 12-years of experience, DECO Medical is a reliable bridge with its customers and producers. We now supply over 90,000 products from needle to entire hospital appliances which have internationally accepted certificates such as CE, FDA and others.

# Deco Medical Provides

## 4 main group of products

### Covid-19 Test Kit

- **COVID-19 Antibody (Colloidal Gold) Test Kit**

Colloidal Gold tests can detect antibody to virus from patient blood indicating that the patient has COVID-19 or has recovered from COVID-19. Less commonly, Colloidal Gold tests can be used to detect the presence of active virus by detecting virus proteins directly. Antibody Colloidal Gold tests for SARS-CoV-2 are produced as test kits used by a specialist or clinician rather than by patients themselves. These types of tests require a drop of patient blood, either from a vein or from a small finger prick, similar to a finger prick test used for blood sugar monitoring in certain types of diabetes. These types of tests work very differently to RT-PCR and LAMP techniques and detect the patient's immune antibody response to the virus rather than detecting the virus itself.

Colloidal Gold antibody tests can be completed rapidly. Colloidal Gold immunoassays for SARS-CoV-2 detect two types of protective antibodies that are produced by the body when the immune system recognises a foreign structure, in this case SARS-CoV-2, the virus causing COVID-19.

A major advantage for this type of test is also the ability to see if patients are currently infected or have recovered from COVID-19 even if they have fully recovered and cleared the virus months ago.

- **COVID-19 RT-PCR Test Kit**

Polymerase chain reaction (PCR) is a technique used in molecular biology to make millions of copies of DNA. PCR is now a common and used in clinical and research laboratories for a broad variety of applications.

Real-time PCR monitors the process of amplification in real time using fluorescence; not only at the end of the reaction as occurs in conventional PCR. Digital PCR is a quantitative method that provides a sensitive way of measuring the amount of DNA in a sample.

Our PCR 2019-nCoV Assay is multiplex Real-time PCR assay for simultaneous detection of 3 target genes of SARS-CoV-2 in a single tube. The assay is designed to detect RdRP and N genes specific for SARS-CoV-2, and E gene for all of Sarbecovirus including SARS-CoV-2.

## Breathing Support Products (Medical Ventilators)

- **Noninvasive ventilators**

Noninvasive ventilators provide breathing support through an external interface, such as a mask or nasal prongs. These are positive airway pressure ventilators that use positive pressure to force gas or air into a patient's lungs. Breathing can be triggered by either the patient or the machine.

- **Invasive ventilators**

Invasive ventilators deliver air through an endotracheal tube inserted into the patient's nose or mouth, or through a tracheostomy, a surgical incision in the neck to access the trachea.

## Healthcare Solutions

- **Disinfection Tunnel (CLEAR-GATE Pro)**

This system is light in weight, easy to install and ergonomically designed and the entire body surface is disinfected and maximum hygiene is achieved with the disinfection process at the entrances to the facilities and public environments. It also provides advances results in the fight against epidemics and in the prevention of epidemics.

- **Disinfection Tunnel (CLEAR-GATE)**

Canovate disinfection tunnel system provides a fast and economical solution for human disinfection in your offices, factories, shopping malls, institutions and public areas with the fogging method that is activated automatically. When a person enters the tunnel, the fogging is automatically activated by the sensor detection.

- **Mobile Intensive Care Unit (MOBILE LIFE BOX)**

Due to natural disasters caused by climate change, earthquakes, epidemics and wars, billions of people around the world cannot access the most basic health services.

- **Face Recognition Infrared Thermometer (STAND ALONE)**

The new generation of body temperature detection technology is based on AI face recognition to prevent Novel corona virus and direct contact transmission. Our high-precision detection algorithm can accurately detect the body temperature whether wearing a mask or not.

- **Mini Mobile Disinfection Purifier**

Innovation Technology on Air Sterilization with fully enclosed design and no ultraviolet radiation leakage. Killing rate of virus and bacteria exceeds 99%, maximizing the avoidance of indoor transmission of respiratory infectious diseases.

- **Automatic Hand Disinfectant (CLEAR-HAND)**

Contact-Free Disinfection with maximum security, easy installation and use

## Other Medical Products

Headquartered in Istanbul, with strategic sales & service, development, training & after sales support activities. Deco Medical is a reliable bridge with its customers and producers, in partnership with Europe and Asia's leading medical equipment manufacturers, We now supply over 90,000 products from needle to entire hospital appliances.

Over the years, we have partnered with only the highest quality & most reputable equipment manufacturers in the world, solidifying our reputation as the leading supplier of medical and healthcare equipment & solutions.

# DECO | POWER

DECO POWER combines more than 15 years of experience in the fields of consultancy, project design, engineering, procurement and overall project management in the energy sector. With a high level of industrial and commercial know-how combined with decades of international sales, engineering, commercial project management and consultancy experience, DECO POWER provides tailor made solutions to its customers based on their requirements, plans, and timelines and set budgets as a single source solution provider.

Our customers can benefit from improved project and equipment delivery and a single point of responsibility by engaging DECO POWER as the solution provider for their projects.

## Consultancy & Project Initiation & Design

DECO POWER evaluates the investments you intend to make on renewable and thermal energy projects in every possible aspect including but not limited to legal obligations, installation processes, engineering, and feasibility studies and prepare investment valuation and due diligence reports for its customers.

Positioning its focal point towards the systems to maximize its life cycle performance and investment return, DECO POWER provides also Life-Cycle-Cost analysis for the customers.

With all this input, DECO POWER aims to support you in the initial phase of project design and implementation planning.

## Electrical Equipment & Products Supply

DECO POWER offers wide range of products and services to a large number of customers around the World in terms of electrical equipment, products, support with installation processes. With our qualified and customer-focused team, we are able to offer a fast and reliable supply chain for our customers for all kind of LV, MV, HV electrical equipment & products and systems.

# Project Management

With our project management services, you will have a single point of accountability and a reduced risk of project delays and failures. This partnership result in a safer, more reliable and cost-efficient solution and service. Our team provides a full set of project management services and solutions required within the energy industry.

This method of partnership includes:

- Integral project solutions
- Installation, start-up, testing and handover
- Minimization of risks
- Coordination with equipment suppliers and integration of different systems
- Power Quality and Reliability Projects
- Energy Management Projects
- Safety and Risk Management Projects
- Safety Studies
- Operation & Maintenance Reports

# Power Plant Investment

DECO POWER serves as a strong and reliable financial partner, starting from the day 1 of any power plant project.

We invest in small scale solar power plants, wind power plants, hydroelectrical power plants, biomass power plants and thermal power plants in all around the World, knowing that they will grow into valuable energy providers in their regions. Our investments occur either as DECO POWER as the sole investor or we invest through our valuable partners.

In addition to powerplants we finance directly, we also partner with financial institutions for credit work to finance powerplants that would be better suited to be financed through such an institution.

As a side support, we provide our partners with an investment valuation report, for all their powerplant related works for them to be able to decide which investment would be most beneficial for them.

# Equipment Supply

---

Deco Global is a market leading supplier and distributor of high-quality equipment and products in Medical, Marine, Defense and Power Industries. We are working closely with the leading manufacturers to offer our clients reliable, affordable and high-quality equipment and products.

Our industry experts receive ongoing commercial and technical trainings to maintain an expert level of product, equipment and application knowledge. All supplies and solutions are committed to delivering prompt, efficient service and the exact solutions you need, on time.

# Project Management

---

Deco Global implements total project management in every aspect and phase of the project. From design, planning and development to on-site management and oversight, we provide a team of experienced personnel, who can deliver diligently and effectively; team management, inspection and supervision from tender preparation, bid evaluation, cost and schedule control, equipment and material procurement, construction management and supervision, to commissioning and start-up support on behalf of our clients.

Deco Global is able to deliver projects for customers facing a variety of obstacles and challenges. These include tight schedules and remote sites where we have needed to consider environmental and technological aspects. With experience working in the US, Africa and Europe, we ensure the highest quality standards are adhered to at every stage of the project.

Our Project Management Services Include:

- Project Review and Appraisal
- Tender Management (Preparation & Evaluation)
- Feasibility Studies
- Material and Equipment Procurement
- Project schedule and cost management
- Project Team Management
- Design Team Management
- Risk Management
- Fabrication and construction management and supervision
- Contract Management
- Project Superintendent
- Quality Assurance
- Start-up support

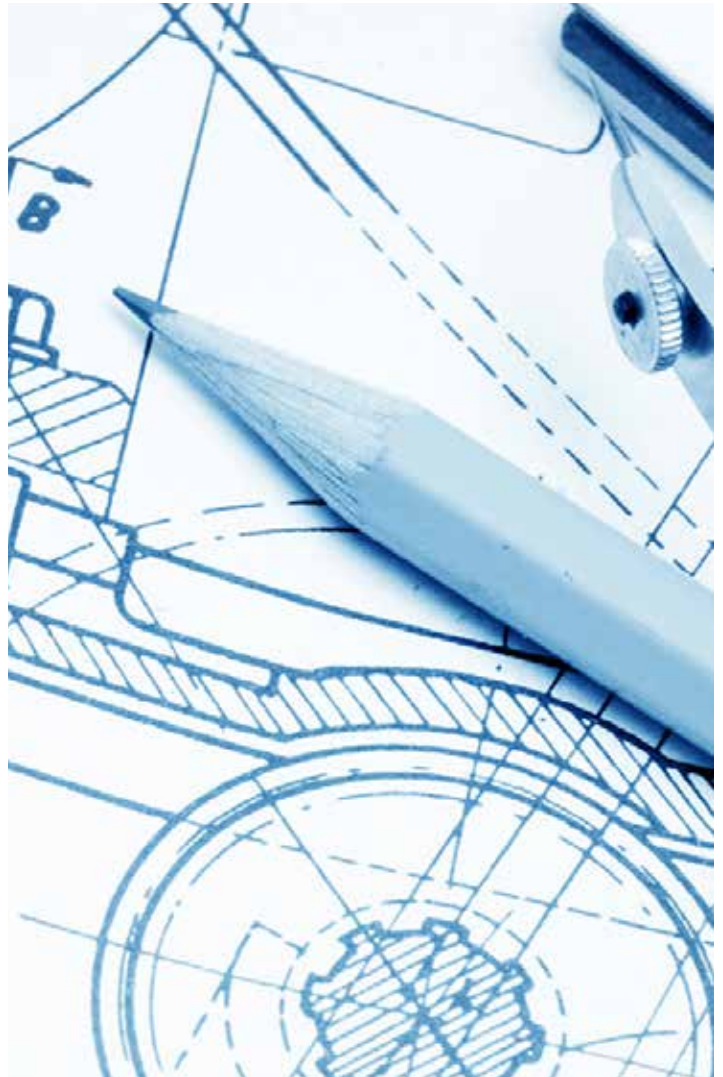

# Engineering

---

Deco Global provides engineering services, specialized nearly all and every aspect of design and engineering works. Every project we successfully implemented shows our wide-angled perspective and customized approach to each and every client.

Our engineering team serves in construction, gas, marine, electricity, building, petroleum, environment-water, urban design, energy, industrial and transportation sectors with integrated solutions blended with different high-quality engineering disciplines and skills. Our engineers are trained to the very highest standards and have vast experience in all aspects of industrial engineering works.

Deco Global's ability to provide engineering solutions is demonstrated through numerous projects successfully completed for governmental authorities and private companies all around the world.

# Turnkey Solutions

---

Deco Global is your reliable partner for turnkey solutions in power, marine and defense sectors and a system integrator offering optimum and affordable solutions for the entire life of your projects. Our experienced project managers and engineers take responsibility for comprehensive solution and provide best services.

We are at your service for your small and large projects, and from short-term consulting to complete project delivery.
